

SPOTLIGHT 186 – Zwarte Non

ZWARTE NON or the BLACK NUN, has firmly established himself as a regular on 186 and 183 metres. Erwin, the operator of the station was first heard as a pirate in 1979 using the name VALENCIA. At this time, most of his transmissions were made on 227 metres. He also used the name KORENAAR for a short time.

After an absence from the airwaves, Erwin returned to 186 metres in 1991 and chose the name ZWARTE NON. There had used to be another station of the same name from the Beekbergen area of the Netherlands but he has not been heard for some time.

Erwin is 29 years old and single. His main job is working in a printing factory but he also does quite a lot of long distance lorry driving as well.

The transmitter in current use is the BC 610 which gives a maximum output of around 650 watts. The antenna used is 36 metres long and some 10 metres high which explains the good signals that are almost always received in this and other countries. The new soundproof studio also contains an amplifier (Marantz), two pick-ups, CD player, tape deck etc, plus a domestic receiver. Erwin is mainly into heavy metal music which was patently obvious from the Black Sabbath T-shirt he was wearing when I first met him during his recent visit to Preston with Johan the Baro! The Black Nun record collection stands at around 400 singles and over 100 LPs which can be found in the studio along with everything else.

The jolly and easy-going presentation heard over the airwaves from the station brings a varied selection of English pop and Dutch music.

Listen out for Zwarte Non on Friday or Saturday nights. Occasionally, he has guest pirates in the studio which may be a good opportunity for you to obtain one or two unusual QSLs.

Reception reports to the station are always welcome and Erwin's best yet came from Finland. Don't worry about writing in Dutch as Erwin can speak and write good English and will always reply fairly quickly with a letter and postcard from his area. The address is: P.O. BOX 122, 7160 AC Neede, Netherlands.

In the next PIRATE CHAT when spring will be upon us, the Spotlight 186 feature will be slightly different and will be a question and answer format when I will be taking a look at the popular RADIO NOLAN. ■

Editorial speaking

First of all I must apologise for being so late with this issue. I simply should have put the deadline later as I had no time to write Pirate Connection two weeks ago. I also waited a few days extra for Igor Krilov's marvellous "Eastern Lookout" column that was sent from Russia on March 19th, but it still hasn't arrived here. It will be published in PC5 instead. However, I am proud to bring you the largest edition of PC ever: 48 pages. Thanks to all my wonderful editors and especially all the contributors. I get more and more letters as PC gets more established as one of the most popular Free Radio magazines in Europe, and I also must apologise to everyone that gets late replies from me or doesn't get no reply at all. I simply tend to become more & more busy and I can't answer as personally as I would like, there's simply no time for me to do that. Anyway, all your letters are read and are highly appreciated here. This issue of PC contains a new column, "QSL Collection" written by Jonny Augustsson who also writes Free Radio Technique. Please send in your QSL notes for 1993 to us here at PC hq's (or directly to Jonny) and take part in the QSL competition. The winner will receive some nice prize (maybe a Pirate Connection T-shirt which will be available soon!). This PC also contains two features on Dutch pirates by Derek (published with kind permission from Pirate Chat) which I'm sure will make good reading. Also, enjoy the "South American Tour" - a very enjoyable story about Jorge R. Garcia's (of Radio Piraña International) recent visit to South America. Thanks for your interest in Pirate Connection. This magazine is entirely dedicated to you readers. Without you, nothing would be possible. Stefan

EURO PIRATE SCENE

Edited by Stefan Printz

Hello everyone and welcome back to EPS. Conditions have been fairly good recently but I think the activities on Saturday nights & Sunday mornings are currently not so hectic as compared to last autumn, although quite a few new pirates have appeared the last two months. However, the activities on 76 metres are becoming more and more 'stable' with more and more stations coming to this band. New stations are Dutch Radio Pluto that's been regular the last couple of weeks with music programmes on 3932 kHz and Wave Radio International which is a brand-new Swedish pirate that can be heard QSO-ing on any band, he's mostly heard on 76, 48 & 41 metres though. Also, peculiar station Radio Psychadelica have made two appearances the last month on 3900 & 3910 kHz. I guess this station must be someone of the already existing 76 metres and considering the operators speak with some foreign accent, there aren't so many to choose between! Another pirate noted on 76 metres two weeks ago was Russian Radio 75. There is also Radio 76 which is expected to appear very soon on the 76 metre band. 48 metres is the band providing most regular stations. DLR from Ireland have moved to 6222 kHz and are heard rather strong here in Sweden. Radio Piraña International has returned from his extensive journey in South America and was back on the airwaves the same day as he arrived back to the airport in Madrid! You can read all about his 'tour' in South America in an article published in this edition of PC, and it's written by Jorge himself. Other newcomers on the bands the recent weeks are Radio Caldonia (which isn't actually new, but hasn't been around for several years) who was on 6275 kHz March 7th, East Coast Radio on 6279 kHz, Radio Kapina from Finland on 6274 kHz and German Radio Lollipop on 48 metres (6290 & 6206 kHz so far) with a certain childish style of programming. Well, it will take too long time to summon up all activities, so let's have a look now on the "news" right away:

Radio Adelante have decided to close down for good. The reason for this is not known,

but for anyone who missed their previous programmes, you'll have a final chance when the station will be active on Saturday night 24th of April on 76 metres and also the following Sunday morning on 48 or 41 metres. Address for reception reports is via Pirate Connection. SPZ

Radio Armadillo from the UK have been rather active recently, but strangely enough they have never been active on a Sunday, only weekdays and Saturdays! Frequencies to check out for are 6285 & 6292 kHz. The address is still unknown. PCH

Radio Atlantis are new from UK and began broadcasting already in December last year. Were also heard the last weekend in January on 6211 kHz. Atlantis now use 6400 kHz (not sure if they have left 6211 for good) and can be heard on Tuesdays, Thursday and Saturdays in addition to Sundays between 11-15 UTC report... FRS JC

Special services for you!

PIRATE CONNECTION

Pirate Connection
Kämnärsvägen 13-D 220
S 22646 Lund
Sweden

Radio Bandolero means "highwayman" in English and was noted on February 20th with a 1 hour dance & techno music programme. The station also often has QSO contacts with other stations. PCH

Radio Brigitte International is said to be the only SW pirate from Belgium and the station now uses 7545 kHz for its programmes. I'm not sure if they have regular transmissions, but they seem to be on twice every month, the second and fourth Sunday of the month. Was noted by me last time on March 14th on 7545 kHz with Dutch folk music and pop music. SPZ

Radio Caldonia has returned to the airwaves after several years of absence from the short wave bands. A programme went out on March 7th at 9 UTC on 6275 kHz, but they had serious problems with frequency drifting. One listener say they drifted from 6271 to 6279 kHz, so they really have to stabilize the oscillator circuit. Caldonia was also reported the previous week, February 28th on 6281 kHz at 10.00 UTC. The address is Box 763, 3100 AT Schiedam, Holland for your letters and reports. FDX

Channel Europe (c/f PC3) wrote in to us at PC hqs once again telling that the only thing that remains now is to get a SW transmitter. They have contacted the address service in Wuppertal and they have got permission to use that address. They have also already printed QSL-cards which are very fine. The main operator will now look for a transmitter which should have at least 50 W of power and I would guess that the station will come on the airwaves pretty soon. SPZ

Christian Pirate Broadcasting Network made another broadcast March 6th on 3910 kHz at 23.15 UTC after quite a long absence. Programming contained acoustic rock & soulpop music and later on some preacher spoke about religious issues. Sounded very much like the religious US stations. SPZ

Radio CLCG which stands for Clandestine Listeners' Club in Germany have been rather inactive the latest years, but reappeared via **Radio Lowland International** on January 31st on 6285 at 8-9 UTC with programming in German and pop music. Unfortunately, Lowland was busted (see below) this day, so CLCG will have to look for a new station that is willing to relay their programmes. CLCG now have new QSL-cards, so why not drop them a line. MK

Correction. (c/f PC3) Albert of **Radio Scotland** in Holland wrote to me telling that the joint broadcast that Scotland ran together with **Radio East Coast Holland** and **Voice of The Netherlands** on New Year's Eve last year didn't take place at Gerrit's place but at the studio of RECH. Albert also says that he's been very busy with his work of late, but he should soon be back during spring & summer on 183 metres or 1509/1512 kHz. Keep up the great work Albert and I do hope that you'll

be more active the coming months. We're all waiting anxiously for your next rock show on MW! By the way, Albert has promised to make some jingles for Pirate Connection in Dutch, which I guess will be available in a month or so together with some other newly produced PC jingles.

AD SPZ

Crazy Wave Radio (c/f PC3) is, as a matter of fact, the new name for **Radio Wahnsinn**. CWR intends to be active every first Sunday of the month via **Radio Waves International** at 10-11 UTC on 7473 & 11401 kHz and every third Sunday via **NIRS** at 8-9.30 UTC. The station is run by two guys calling themselves Crazy Rady and Chris Ise Coperator. PCH

Radio Delta (Elburg) (c/f PC3) has plans for broadcasts on 7425 & 11405 kHz. Meanwhile, the station appears quite often on 6203 kHz with 80 W. The station also offers a magazine which contains quite a lot of info on the station's history, the equipment, listeners' letters etc. Costs £5 or 10 DM. BQ SPZ

Radio Delta (Ruурло) provide very good signals on 6199 kHz where they can be heard once a month or so with music programmes hosted by Peter Greenfield. Their latest transmission was on March 14th and was received here with very good signals; I was especially very impressed by the nice 'heaviness' in the modulation

signal.

SPZ

Dun Laoghaire Local Radio from Ireland have started a DX-show which is aired each Sunday. The show is called "FRC Ireland" and any info can be given to them by calling 3531-285-2302. By the way, DLR has now moved frequency to 6222 kHz after receiving complaints from both **Roger Davis of BRI** and **Joe Vincent of Jolly Roger Radio** about DLR causing splatter to them.

FDX PCH

raid of **Star Club Radio** in September last year when they got scared a bit and hence decided to build up a new station in order to try making fun with the German Post! The first broadcast early December last year was very successful and got over 40 reception reports from all over Europe (which is a very good result these days) and everyone will receive their special QSL-card. Because of security reasons, the station will not do any regular programming. FDX

EINER muß ja schlauer
sein als die Post !

THE FOX A.M.

Postbus 386

NL-5900 AJ Venlo

Nederlande

Radio Free Wales is presumably a brandnew Welsh pirate that made its debut broadcast over **Jolly Roger Radio** on January 9th on 6210 and on January 10th on 6240 kHz. Their address is the shortest one I've ever seen: RFW, Caernarvon, Wales! PCH

Radio Fusion International will soon have their QSLs printed and those of you who have sent in a report to Jake might get a QSL along with this issue of PC, provided Jake get the QSLs in time before the PC issues are posted. Jake says he apologises to his keen listeners for not having sent any replies yet, but he promises to answer more quickly after the QSLs have been printed. Anyway, Jake has lessened his activity a bit, which is mainly due to his involvement in building up a local FM pirate station and also due to the quite heavy telephone interference he causes on the telephone lines in his neighbourhood. His wonderful 41 metre programmes on 7415 kHz will take place once or twice a month and on 76 metres he will be on most Saturday nights, although not so often with normal broadcasts but with QSO-ing. Also listen out for his "Free Radio Climax" which will be featured on most 41 metre broadcasts and is a very comprehensive and interesting DX-programme with the very latest info & tips on the Free Radio scene. Fusion's last broadcast on March 14th was received with good signals both in Germany and the UK and featured various famous jazz fusion musicians.

MKV SPZ

Radio East Coast Commercial (c/f PC3) are now regular every first Sunday of the month on 6250 kHz. Programming will also include RECC's famous DX-programme. FRS

East Coast Radio is a newcomer on 6279 kHz heard January 30th & 31st for the first time with "classic rock for Europe". The programmes are hosted by **Mark Rogers** who has previously been on **RFM** (London) and **Radio Caroline**. No address has been announced. FDX PCH

Emerald Radio International (c/f PC3) are now using 6268 kHz but they are always weak here in Scandinavia, if they are heard at all. A programme called "Magazine Show" is the main programme aired on the station and it contains info on the SW scene and extracts from various media magazines. Telephone number for the station is 353-1363986. PCH SWN

The Fox AM (c/f PC3) is a joint project by **Radio Rabbit** and **Radio Vanessa** from Germany. The station was founded shortly after the

Idea radio is the name of a brandnew Italian private station that began broadcasting on March 7th using the frequency 7380 kHz. The format of the programmes is light music. The station verifies reception reports and the address to write to is Idea Radio, C.P. 38, 16030 Gattorna (GE), Italy. You can also give a call to the station. Their phone number is 010-6530836.BP

Independent Sounds is a new, probably German based, pirate that was relayed via the facilities of **Radio Waves International** on February 14th on 7473 kHz at 10 UTC. PCH

Heavy Dude Radio have been very active on 6210 kHz of late, but will now have to change transmitting site during spring/summer time and their activity may therefore decrease a bit. A new guy has joined the station, namely **Mister Goat** who has been in charge for "Heavy Drunk Top 10" which he has recorded while getting drunk! HDR has, in addition to their Sunday broadcasts, been broadcasting on Saturday nights on 6210 kHz which I guess probably noone has heard due to the busy 48 metre band in the evenings and 6210 is often occupied, but HDR say they don't care that much, the main thing is that they are having fun. SPZ

Radio Kapina started broadcasting February 21st on 6274 kHz and uses 20 W of power. The station comes from Finland and their station name means "rebellion" in English. If you have the luck to hear the station, you are welcome to write to their contact address which is Box 220342, 5600 Wuppertal 22 in Germany. AN FNS

Radio Liberator is a new name on the SW scene and they were heard for the first time on January 30th 6295 kHz. "The DJs had London-area accents and sounded like the same clowns as on **Radio Lion**" John reports. The station has no transmitter but rely on other stations who are willing to relay them. Address is not known. FDX JC PCH

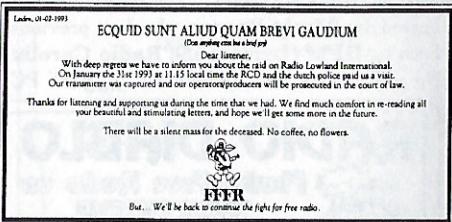

Radio Lollipop seems to be a German newcomer to the 48 metre band. Was noted March 7th on 6206 kHz and also noted here with good signals March 14th on 6290 kHz with several jingles and announcements. Unfortunately, I have no further info to give you regarding this somewhat peculiar station except their address which is the Wuppertal maildrop. Hopefully I'll have

more info on Lollipop in PC5. FDX SPZ

Radio London made an appearance via **Weekend Music Radio** on Saturday night January 24th on 3910 kHz with very good signals received here in Sweden (S9 on my receiver). Station operator **Andy Winter** says he will run to a schedule appr. once every two months and can be heard via the facilities of many different stations on SW, including **WMR**, **Jolly Roger Radio** and the new station **Xenon Transmitting Company**. PCH SPZ

Radio Lowland International raided!

I guess most of you have already heard about the very sad news that popular pirate Lowland became a victim of the RCD on January 31st at 10.17 UTC, at a time when Lowland were broadcasting on 6285 kHz with their usual service. The transmitter was confiscated and all people involved in the station will now be prosecuted in the court. Lowland want to thank all their listeners for all the letters and support and they also say that they will try to come back already this summer. A raid is always a tragedy and a blow below the belt for a station, but I do hope Lowland will have the strength to return some day. Meanwhile, thanks for all enjoyable programming Lowland! BQ MDG MK SPZ

Radio Matilda made another appearance on February 7th on 6258 kHz and 31 metres (9985 kHz?). As you could read in Anssi's column in PC3, Matilda is a special name used when several of the Finnish pirates meet and have joint transmissions. Next broadcast of Matilda will take place some time this summer. BEFF FNS

Frank of **Radio Mayday** writes in a recent letter that they are planning to increase their power to 200 W (!) in the near future. The linear amplifier has already been built but hasn't been tested yet. Frank also plans to do joint transmissions with **Radio Diablo** on Sunday mornings. The transmissions will take place on 31, 41 or 48 metres. FNS

The **1993 Worldwide Pirate Radio Log-book** (c/f PC3) has now been printed and is available from **Snallygaster Press**, P.O. Box 272, Springs, PA 15562, USA. The book covers the major events and trends of SW pirate radio in Europe, Oceania and North America with emphasis on logging lists, sorted according to frequency, date and also in alphabetic order! The book is written by **Andrew Yoder**, who publishes the **Pirate Pages** and also writes regular columns for **The ACE** and **FRS Goes DX**. The 1993 Worldwide Pirate Radio Logbook is very readable and simply a must for all true Free Radio enthusiasts. Also available from Snallygaster Press is George Zeller's **Pirate Radio Directory**, which I unfortunately haven't ordered yet but I will write a short review of it in the next edition of PC. The books cost \$14 each (surface mail \$12), but if you order both books, it will only cost you \$22 (surface \$20). AY SPZ

Radio Nolan raided for the fourth time!

It never rains but it pours... Shortly after the raid of Lowland, yet another Dutch pirate had to face the cruelty from the Dutch RCD authorities. Nolan made a comeback on 48 metres on January 31st, after one year's absence. He was broadcasting between 6.00-9.30 UTC on 6212 kHz with his usual rock format, including Status Quo and Deep Purple, and at 9.25 his signal was tracked by the RCD, only 5 minutes after the sign-off. However, the raid wasn't carried out until February 2nd, two days after the broadcast which really is something worth noticing. Two policemen plus a guy from the postal authorities payed a visit to operator Ronnie telling him that they had logged him on the Sunday and that they wanted his 100 W transmitter. Ronnie is now risking the consequence of ending up in jail, as he has been raided three times and been in jail twice before. "I wonder what the judge has got in store for me this time" Ronnie says. Ronnie also says this might be the end of his station, but he hopes to be back next year

by getting a relay.

BQ JL JR MK PCH

Radio Pacman is the latest newcomer to 76 metres together with **Radip Psychadelica** and **Wave Radio International** (see below) and was logged on 3932 kHz on March 6th at 23.51 UTC. Pacman was then heard again March 21st on 3931 kHz at 0.00 UTC with Q3 quality here. Address: Box 103, 8120 AC Olst, Holland. FDX SPZ

The "jungle man" (nick name used by Bill!) of **Radio Piraña International**, **Jorge R Garcia**, is now back from his lengthy journey in South America and was heard again on Saturday night February 13th which was the same day as he arrived to Europe! A very enjoyable show was also heard on 6255 kHz on February 14th with a programme including Coca-Cola commercials and recordings of South American radio stations. Jorge has been very active the latest month, but says that he will decrease the number of broadcasts a little bit. Jorge also recently informed me about his coming transmissions this spring. His schedule is as follows: 18th of April at 15 or 16 on 21590 kHz LSB, alternative frequency 21780 kHz; at 21 or 22 UTC on 13950 kHz. The same times and frequencies will be used the **16th of May** and **20th of June**. The evening broadcasts at 21 or 22 UTC will probably be beamed to South America. 21780 kHz will be used as an alternative frequency in case 21590 kHz would be occupied. "Right now, the latter frequency is very clear and our directional antenna works better at this frequency. The evening transmission will possibly be directed to South America (as far as we know, we haven't succeeded in reaching Argentina and the southern parts yet!). But anyway, this transmission might reach North America too. Our transmission on December 6th last year was carried out with the directional antenna and we received several reports from North America for this. The reception was poor though." Jorge says. JRG SPZ

Pirate Freaks Broadcasting Service

were on with one of their very rare appearances on March 7th using 6285 kHz. The programme was hosted by **Pirate Andy** as usual with his soul & disco music format. It seems as though PFBS used very low power since the signal was rather weak here (Q2). A few years ago, when the station was as most active, they usually were

very, very strong, so I really wonder what's happened to all those high powered transmitters I believe PFBS once had? Unfortunately, I have no information on PFBS' future activities. SPZ

Radio Psychadelica is a new 76 metre pirate that have joined the line-up of those crazy spoof-stations. Their first test broadcast was aired March 7th on 3910 kHz, noted here between 0.00-0.21 UTC featuring some psychadelic Tangerine Dream tunes from the early 70's. Good signals were reported from UK, Scandinavia and Germany. Their second broadcast was more lengthy (1 hour) and went out two weeks later (March 21st) on 3900 kHz at midnight UTC with an absolutely crazy show, including rather extreme psychadelic music (early Gong tunes, Pink Floyd "A saucerful of secrets", "Alan's psychadelic breakfast" etc!), although the show began with Beethoven's famous "Fate"! The station had female DJ Sheila in the studio plus another DJ reading his latest erotic poems! The programme also featured several strange sounds and noises of sexual excitement, apparently caused by the poems and the attraction between the two DJs. The station contacted me a while before the fist broadcast went out and they decided to use my personal address for correspondence. The operators want to keep a low profile though and was reluctant to tell anything specific about their station, but said they have a handful of 76 metre crystals including 3900, 3905, 3910 & 3915 kHz. They also promise to answer all reception reports with their "very psychadelic QSL-card". SPZ

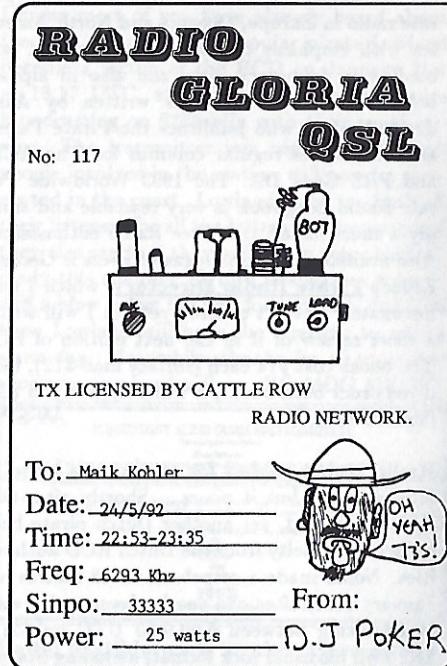

TST Rock will leave SW for good in favour of **Radio Recharge International**. As a matter of fact, the people behind these stations are the same and they thought it was stupid to run two stations. RRI have bought new equipment and should sound even better in 1993 and will use 6270 kHz in the 48 metre band. RWI

The nice surprise on 76 metres March 21st was Russian pirate **Romantic Space Radio** who had a DX-programme in English on 3910 kHz LSB (I guess via Live Wire Radio, right Bill?), airing recordings of many stations that Arty has received during the last couple of months in Moscow. Very intersting and also very enjoyable! Great Arty. Among the pirates Arty had received were Radio Meteor, Radio Armada and Britain Radio International. Signal strength

here was S7 and reception quality Q5. SPZ

Radio 75 is a new Russian pirate that appeared on Saturday night March 21st on 3905 kHz QSO-ing with **RWBI**. No address is known, but you might try using the RWBI/RSR address in Moscow. FDX SPZ

Radio 76 is obviously (considering the name) another new 76 metre pirate that intends to begin transmission in the near future. Power is appr. 25 W with a long wire antenna as aerial. Contact address is via PC. SPZ

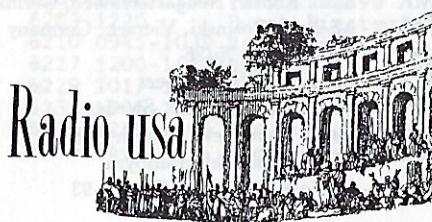

Subterranean Sounds has now moved to 3905 kHz in the 76 metre band which is a much clearer frequency as their "former" frequency of 3945 kHz (well I guess Steve hasn't given up 3945 kHz yet?). A normal programme should have gone out March 7th, but Steve says his aerial wasn't completely ready so he just put out a loop tape with an announcement saying something in line with "we'll have no proper transmission due to technical problems". However, signals here in Scandinavia were very good! Q3-4 noted here and also reported in Norway with very good reception, so this really should be good news to Steve. Keep up the good work Steve! Last minute note: SS was heard again with normal

programming on Saturday night March 27th on 3905 kHz. FDX SPZ

Sweden. Early March, the Swedish parliament approved a bill to permit private commercial radio stations in this country, beginning April 1st. Initially 60 licences are to be granted. If there are several applicants for a licence, it is to be sold to the highest bidder. Government agencies and newspapers will not be allowed to own stations. The present community radio stations will also be allowed to carry advertising. SCDX via TT

Comeback for Radio Tonair? I noted with great interest that well-known Dutch SW-er Radio Tonair were noted for a short time after **Radio Orang Utan**'s usual oldie programme on 6200 kHz January 24th. Tonair was one of the most active and most powerful Euro-pirates in the mid-80's with regular broadcasts on both SW & MW with very enjoyable broadcasts. I certainly hope this was an indication of that Tonair is thinking of a serious return to the airwaves, fingers crossed here. Last known address for the station is Box 21, 7010 AA Gaanderen, Holland. FDX SPZ

Radio USA from the USA recently sent us a schedule for some high frequency test broadcasts which will commemorate their 10th birthday this year. A couple of broadcasts went out during the month of March, but unfortunately noone has managed to receive their signal here in Europe as far as we know, although both Jorge and Bill say they heard something on 21780 kHz (LSB) at 17 UTC March 13th, which was one of their pre-determined broadcasts in March. However, there will be another chance for everyone on April 24th on 14430 kHz LSB ± 3 kHz at 22 UTC, so please do listen out for this. It might be your first US pirate you receive! A special anniversary photo QSL-card is available for anyone who sends in a correct reception report. Address: Box 452, Wellsville, NY 14895, USA. BL JRG SPZ

Wave Radio International is the name for the latest new Swedish Free Radio station. WRI was first heard on March 7th on 3916 kHz (LSB) at 2.00 UTC when he joined the QSO between **Radio Fusion International** and **RWBI**. Then the station used the name **Radio Test** as he couldn't really decide what name to use for his station. Four days later, March 11th, he ran a QSO with RFI on 7415 kHz and then he called himself **Moonlight Radio**. But Jake of RFI suggested him to change the name into another since there's already another pirate using that name as reported in PC3. However, WRI continued to use the Moonlight identity for another week or so, until he'd come up with this new name, Wave Radio International, during the QSOs on 76 metres Saturday night March 20th/21st. WRI is operated by a keen radio listener and radio amateur with much technical knowledge. He's in his mid 30's and likes mostly to QSO with other stations, but there also is a chance that he will put out some normal music programmes as well. He uses modern amateur radio equipment and can use any frequency between 0-30 MHz and you can expect him to be active on 76, 48 & 41 metres in the first place, but also on MW, the 45 metre band (6.6 MHz) where there are quite a few illegal radio amateurs QSO-ing. Power at present is 50-100 W and he uses different types of antennas for his broadcasts (dipoles, longwire aerials, delta loops). Wave can be contacted via PC. SPZ

Radio Waves International are looking for a new channel in the 41 metre band and has been heard testing on some different frequecies the last couple of weeks. If it doesn't work out satisfyingly, RWI might change their current 41 metre outlet to 48 metres. RWI

WNKR's 76 metre transmitter stolen.

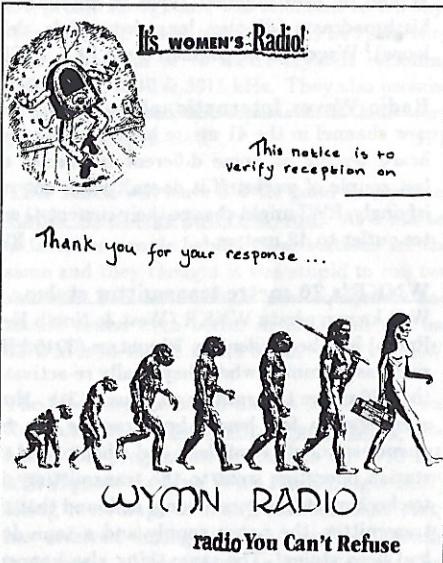

Well-known pirate WNKR (West & North Kent Radio) had been silent on 76 metres (3945 kHz) since last summer, when they finally re-activated their 76 metre transmitter on March 13th. However, after a few hours' broadcasting the frequency suddenly went dead and when one of the station operators went to the transmitting site to check what had gone wrong, he found that the transmitter, the power supply and a tape deck had been stolen! The same thing also happend to WNKR last year. WNKR believe it's some guy from the neighbourhood that's stolen their equipment and not the authorities. But WNKR

hope to resume their 76 metre broadcasts in the near future, despite this sad incident. FDX

Wrekin Radio International are still broadcasting every Sunday on 12265 kHz 9-12 UTC and provide fair to good signals here in Scandinavia. Now they are also thinking of beginning on 41 metres in addition to their 12 MHz outlet says... MK

Another US pirate, Pirate Jenny of **WYMN** (Women Radio) could be heard with their "1993 broadcast" on February 21st on 7429 kHz at 11.00 UTC via **Radio Fusion International**, originally broadcasted in the US January 30th on 7413 kHz (see Chris Lobdell's 7415 Report for further details!). Jenny first announced "WYMN, Women Radio - Free Radio for the feminist world" and then featured stand-up comedy by Kate Clinton (very enjoyable!). The programme also included rap songs by some girls complaining about the FCC hunting pirates and song-leader Annie teaching children the "Co-dependent song": "It's not you fault that your mama is an alcoholic, that your daddy is in jail, that your brother is a junkie etc"!!! Anyone who didn't hear this really missed something! **Jake** of RFI says he will relay more shows by Pirate Jenny and possibly also other US pirates as well.

JJ SPZ

Radio X was noted by Maik on Saturday January 30th on 6205 kHz at 9.45 UTC with a programme in Dutch and English. Power is only 8

W, despite this Maik had a rather good SINPO noted of 33333. Address: Box 102, 7360 AC Beekbergen, Holland. MK

Xenon Transmitting Company is the new name of **Radio Mutiny International** and is run by **Matt Roberts**. The recent change of names is due to Matt having undergone some voice treatment and have had his voice changed which used to be very hoarse. With his new voice, he simply decided to start a new station! The station's first tests were made under the name **Mystery Station** on January 16th & 17th and normal programmes followed January 24th & 30th. Other DJs on the station is **Tommy Teabags** (which we believe is no other than Matt!) and **Rick Slick**. Inventive names, eh? Matt says that he will active both Saturdays and Sundays and the frequency to check out for is 6257 kHz. FDX PCH SPZ

THE PIRATE LOG

Hello, all free radio friends, and welcome to the 2nd edition of the Pirate Log. First I would like to apologise to you who contributed to the Pirate Log in PC 3. In all the exitment I forgot to tell who you were, but I hope you are not too mad at me. I would like to thank everyone, who wrote to me this time. It was very nice indeed to read that you liked the log, and thanks a lot for all the points of views that you gave me. Here is now all the contributors for this log.

=====

What an enormous log this was. Thank you very much for your contribution and I would love to get many logs from you readers next time. I wish you all the best and keep fighting for free radio.

THE 7415 REPORT
By Chris Lobdell

Greetings from the other side of the Atlantic! Hopefully, the signs of spring have set in on your area as the New England area has had a snowy winter this year. I would like to lament the passing of the SIGNALS PROGRAM which aired its last show on 21 February 1993. Sponsored by The Radio Collection, of Briar Cliff Manor, NY this show aired over WWCR and had "The Pirate and Clanny Report" hosted by Kristen Kaye. Her radio show was one of the few sources of US pirate activity and will be missed by many of us here in the good ole US of A. Now, let's get on to the logs!

RADIO ESOTERICA (add: Stoneham) made one more broadcast on 14 January at 0225 on 7417 kHz in AM mode. This was a repeat of the December show which included music from Italy, Japan and Germany. This station has proved to be an excellent QSLer. Future shows will include segments by a Mrs. Beasely, an elderly woman with a British accent!

One of the more active pirates during the past few months has been **RADIO AIRPLANE** (add: Wellsville). Broadcasting from "The Free Skies Over North America" from his piper cub airplane. Noted on 23 Jan. at 0250 UTC on 7417 kHz and on 6 March at 0140 on 7420.5 kHz and 0245 on 7416 kHz. He uses original comedy material and in one humorous show, his friend Dick Tator flushes an FCC monitor down the toilet after eating his cat. Funny stuff. They issue a nice laminated QSL which is actually an FAA flight log.

If you are unlucky, you might come across **KID RADIO**. He comes on the air after his parents have gone out for the evening and IDs as "This is KID Radio, the QSO station, can anyone hear me?" Noted at 2245 at 7415U on 23 January. Has no maildrop, but says will QSL reports published in the ACE bulletin. He'll call for QSOs for a while and then leave if nobody answers.

A new station noted on 24 January at 1428 UTC on 7415 was **BAGHDAD RADIO**. This station announced no maildrop. Programming consisted of Middle Eastern music, ADs for Omar's Restaurant and "all lies all the time". It was wiped out by Tangerine Radio's sign on around 1433 UTC.

TANGERINE RADIO made its comeback in a big way on 24 January (add: Wellsville) on 7419 kHz at 1443 UTC. Completely wiping out Baghdad Radio it was heard with music by the Dead Kennedys, The Bobby Fuller Four. DJ Rick Forrester read a speech by a Hungarian leader of free radio. This station was also noted on 30 January at 2230 and 2330 UTC. Nice to have this station from the mid 1980s back on the air!

Pirate Jenny of **Women Radio WYMN** (add: Wellsville) made a return to the airwaves on 30 January via CSIC on 7413 kHz at 2303 UTC. Her show featured the comedy of Kate Clinton (no relationship to our president!) and music by feminist groups Dos Fallopia and The Yeasty Girls with such classics as "My Breasts Are Out Of Control"! My favorite was the "Co-Dependent" song where kids learn to save the rent money and not blow it on horse racing. I understand that Jolly Jake of RFI relayed this show on his broadcast recently.

As we entered the month of February, one of the new stations heard was **WREC** aka "RADIO FREE EAST COAST". Noted on 7418 kHz at 0200 on 7 Feb. with a mixture of rock and country music (add: Wellsville/BRS). The DJ calls himself P.J. Sparks and was relayed by the North American Pirate Relay Service (NAPRS). The station hopes to have its own transmitter back on the air soon.

Jolly Jake and his own brand of jazz fusion and heavy metal music hit the airwaves of

the USA on 12 Feb. **RADIO FUSION INTERNATIONAL** was noted on 7417 with Air raid sirens that could be heard at the start of the show. It also included an ad for Pirate Connection Magazine. The usual Halden Norway address for reports was announced. The broadcast was also repeated in the USB mode on 27 Feb. at 22:08 UTC on 7417 kHz. The relay station, according to informed sources, was the NAPRS.

UNION CITY RADIO returned to the airwaves after a long silent period. They were noted with marathon shows on 15050 kHz on both 13 and 14 Feb. from around 2100 UTC till around 0000 UTC. This station played rock music and some comedy bits (add: Wellsville). Let's hope we hear more of them in the future.

Another station that we heard in February was **GROUND LEVEL NETWORK** (add: Wellsville). Noted on 7 Feb. at 2300 on 7413 kHz, the DJ who calls himself "Just Bob" uses a 40 watt AM transmitter. Programming consisted of Bob reading articles about penile curvature and orthodontic pacifiers! QSLs were received quickly from Bob who also claims to be an exhibitor of photographs.

What would a pirate report be without **THE VOICE OF THE GREAT WHITE NORTH** aka **CSIC**? They were heard on the usual 7413 kHz at 0200 UTC on 21 Feb. (add: BRS/Merlin). This was a repeat on a September show featuring comedy and rock music, including John T. Arthur's "Fruit Of The Loom News Briefs". In a letter intercepted by your editor, Rambo, head honcho of CSIC, said he was going to try new frequencies in the 6800-7000 kHz range in order to avoid jamming and the coastal station WLO which had recently been assigned 7415 kHz by the FCC.

THE FOX (add: BRS/Wellsville/Merlin!) made an appearance on 27 Feb. at 0010 UTC on 7415 kHz. The show featured a religious parody of Pastor Bob and The Little Highway Chapel and gave a 1-900 phone number to call @ \$2.95 for the first minute. This station was going to give out a 1993 WRTVH as a prize for the best comedy material submitted on tape.

WMPO, at least I think that it was!, was noted on 27 Feb at 0114 on 7415 (no address) with a comedy show featuring various air checks that were available from a company in Texas called "Payless". IDs were available for teen age boys who like to have sex with sheep, truckdrivers who forget their names, etc... This may have been a relay by The Fox.

Rob Roy, the voice of **RADIO SCOTTISH MONTREAL**, was noted back on the air via CSIC on 27 Feb. at 2300 UTC, freq: 7413 kHz (address: BRS). This station features current events that are taking place in the Scottish community of greater Montreal and Scottish music. We liked the music, but found the current events info more suited for those who live near the "cultural center of North America". A good verifier!

The weekend of March 13-14 will always be known as the "Blizzard Weekend of 1993". Hurricane winds and snow measured in meters belted the entire Eastern Coast of North America from Alabama to Newfoundland. Because of the bad weather, many pirates took the opportunity to broadcast, feeling that the FCC bureaucrats wouldn't try to brave the floods and snowdrifts to bust anyone.

One of the first stations noted was **KMRZ** (ex-WARI) (add: Wellsville) who was heard on 15050 around 1958 UTC on 3-13. Dr. Lobotomy was commenting on the amount of snow falling between rock mx selections. At 2015, he did a relay of the English? pirate, **RADIO RECHARGE INTERNATIONAL** which lasted until about 2100.

Later on 15050 was a new pirate, using the initial **URGZ** (add unknown). Very poor reception here but the program seemed to be comedy. Heard around 2300 utc on 13

March.

WREC had his transmitter repaired and was putting out a great AM signal! Noted at 2345 on 7418 with a relay of THE VOICE OF OZ. Nice show, featuring mx by the Moby Grape and Gordon Lightfoot. (add: BRS/Wellsville).

Other pirates heard were **ACTION RADIO** (add: Nebraska) in AM around 0115 on 7415. **RADIO MORANIA**, 0058-0115 on 7417. Interesting show featuring D.J. John P. Dingle. They claimed to be the external service of Morania and every time they announced their address, they would deliberately generate noise so it couldn't be heard!

WRV (aka "The Radio Virus") was noted at 0235 on 7416. DJ is Pirate Pete who promised a "HIV Positive QSL" for reception reports.

Other stations noted were HE MAN RADIO, RADIO USA, RADIO AZTECA, WYMN, TANGERINE RADIO, and WLIS. As you can see, it was a pirate listener's goldmine!

That wraps up this report. You'll have to wait for the next issue of PC to see if WBNY, The Voice Of The Rodent Revolution makes its annual appearance or if XEROX, Radio Duplicado can overcome equipment failures by the time April Fools' Day Rolls Around!

73 and FFFR!

Chris.

Snallygaster Press presents two new books that can help anyone uncover the mysteries of underground broadcasting!

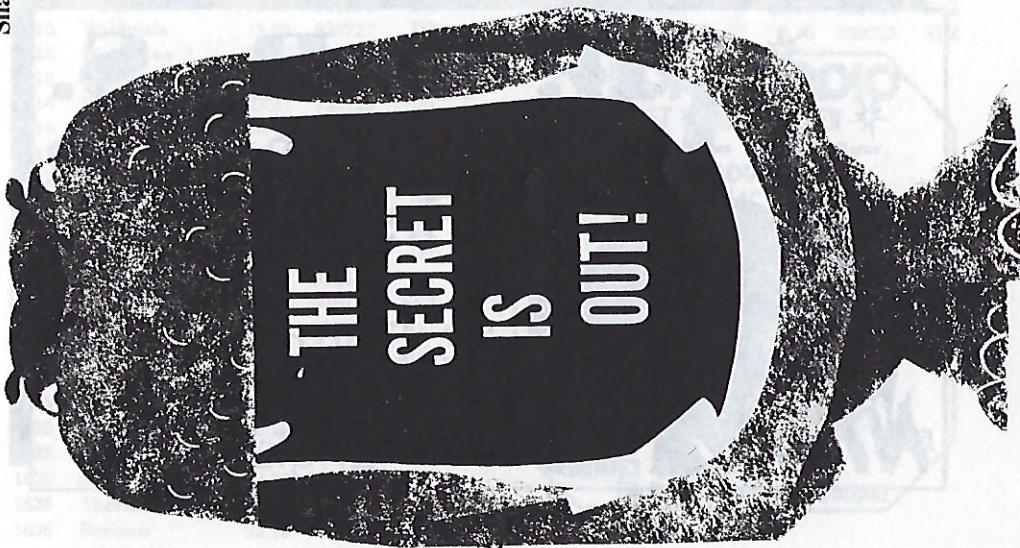

In the past 5 years, millions of people have been intrigued by the sights of unlicensed ("pirate") broadcasters. This concept has been portrayed in movies, such as *Pump Up the Volume*, and in the real-life exploits of Radio Newyork International, which was voted the best radio station of the year by *Rolling Stone*. Now you can procure the secrets of underground broadcasting with these two new books, which are available from Snallygaster Press.

Book #01 *The 1993 Worldwide Pirate Radio Logbook* by Andrew Yoder is a complete guide for someone to find pirates on shortwave anywhere in the world. The book lists the time, date, frequency, and station name for every shortwave pirate broadcast logged in North America and Europe. Oceana is also covered. In addition, the lists are sorted chronologically, by frequency, and by station. A complete list of station addresses and an overview of the year in Europe and North America are presented with future trends. This book is \$10, 8.5" X 11", and is 92 pages in length.

Book #02 *The 1993 Pirate Radio Directory* by George Zeller is a guide to the stations and programming that are available on shortwave in North America. The book lists every North American shortwave pirate that was heard in 1992 and provides detailed information about the announcers, types of formats, and ideologies. Also, Zeller shows you how to write to and receive verification cards from these elusive stations! This book is \$10, 8.5" X 11", and is 90 pages in length.

ONE EIGHT SIX

With Derek Taylor

I said last time that 186 metres was not dead, but it has certainly gone into a somewhat cataleptic state since the sudden changeover to 183 metres.

183 metres is now firmly established as the N°1 choice of the Dutch medium wave pirates. Most of them can now be found here. The few remaining 186 metre operators are making plans to move once they have obtained the necessary crystals.

The latest converts to 183 metres are: **Piepzender**, **F16**, **Studio 4**, **Thoreline**, **Sapporro**, **Calypso**, **Ymuiden** and **Peacon**. Also the welcome return of **Hollandia** and the **President** who have both been inactive for the past 12 months.

Another **Delmare** has also been heard giving an address of Box 432, 3330 AK Zwijndrecht, The Netherlands. The station does verify and reports in English will be ok.

Another old favourite due to make a comeback is the **Bloemfontein**, so do listen out for this one.

Waterman now has a regular music programme every Tuesday evening. Unfortunately he operates around the 1614 kHz area and reception is difficult due to the telex interference.

One of the old-timers of Dutch MW & SW piracy

was recently raided and had all the equipment confiscated. **Radio Nolan** was busted by the RCD and he wasn't even transmitting! They came round two days after a Sunday SW transmission. A bit of warning to the other pirates there to be very very wary of who they answer the door to. Ironically Radio Nolan is the next station lined up for my spotlight feature.

Some news of two Russian pirates. **Radio Samokat** (Perm) and **Radio Pelengator** (Orenburg) operate around the 1632 kHz area of the dial with short QSO contacts.

Following on from last time, I now have the address of Veronica (A), so all reports can be sent via DPRS.

Finally there was a slight misunderstanding in the information from DPRS page from the last Pirate Connection. The impression was given that **Radio Pirana** (Oldenzaal) was in some way associated with Box 27 & Box 13 in Weerselo. He has no connection at all with these boxes. Pirana always replies to QSL reports and his address is: Box 206, 7570 AE Oldenzaal in the Netherlands.

73 and till next time...Derek

SPOTLIGHT 186 – Radio Delta (Ruurlo)

NOT TO BE confused with Radio Delta from Elburg, RADIO DELTA Ruurlo is the best known and most active of the two stations. Coincidentally, both of them also operate on the shortwave bands.

In 1980 as a young 17 year old, Gertie (pronounced Hettie) started his pirate career on 101 MHz FM. In December 1981, he made his first appearance on MW 227m. This though was short lived lasting for only one year, after when he was not heard for three years. Then, much to the delight of DXers, he made a return to MW 186m in 1985 with weekend international programmes.

1987 saw the first shortwave transmission which was made on 6318 kHz using the name PETER BELL. He was quite a regular and became quite well known as an international pirate. For his first SW transmission, Gertie received 52 reports from several countries. RADIO DELTA has been heard ever since, dividing his time equally between SW and MW broadcasts.

Taking a look at the studio we find transmitter (homemade), power amplifier, inverter, turntables, mikes, cassette deck and a very large selection of records and CDs. Gertie freely admits to a dislike of Dutch traditional music and plays nothing but English rock mainly from the 70s and the 80s. As I said, the transmitter is home built along with the power amplifier which both give outputs of around 200 watts. Gertie is very technically minded and has built many transmitters one which was once capable of giving out 1500 watts!

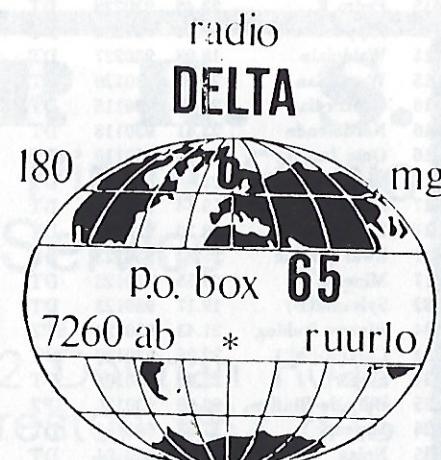

His receiver is the Panasonic DR26. The antenna is a special inverted V design. Each leg is 24 metres long and the total height is 15 metres. He lives on a farm so luckily there is no shortage of antenna space!

Gertie is single (lucky man!) and is now 29 years old working as an electrical and hydraulic mechanic. He has a good com-

mand of English and is spends one night per week at evening school learning the language.

At the moment, and especially since the emergence of the dreaded interference on 186m, RADIO DELTA is heard very irregularly on MW. However, he transmits every second weekend of the month on 6200 kHz SW. With his powerful transmitting equipment, reception is good and often excellent in many parts of Europe. Some nice QSL cards, stickers and a station fact sheet are available from RADIO DELTA for correct reception reports. Write to: P.O. BOX 65, 7260 AB Ruurlo, Netherlands.

In 1993, RADIO DELTA should be sounding a little different. Gertie is taking a well earned break from the mike to concentrate on the technical side of operations. Programming will therefore be handed over to friend, Peter. Listen out for the new style RADIO DELTA complete with jingles. Hopefully the station will be around for some time to come as it is hard to imagine a SW band without this famous pirate ■

PIRATE CHAT MAGAZINE

PIRATE CHAT is published once every two months from offices in England and distributed to subscribers throughout the world as far away as the USA and South Africa!

Each issue contains from 30 - 40 pages, packed with up to date, reliable and comprehensive news. Some of the features in PIRATE CHAT include: *Derek Taylor's MW News, SW Logs at a Glance, the A-Z SW Section, Sat Dx, FM News from Around the UK, Steve Midnight's thoughts on Free Radio, Spotlight 186, SW station profile, USA station profile, USA Roundup* and much more. Why not become a part of PIRATE CHAT and subscribe today?

A sample copy costs £1 which is a special introductory price.
 A six month subscription costs £6.
 A year subscription costs £10 and this is the best value subscription.

Money will be accepted in any currency but please make sure that cheques, postal orders and eurocheques are not made payable to anybody, otherwise we may have difficulties in cashing them!

Our address is: 12 DORMAN ROAD,
 PRESTON,
 ENGLAND,
 PR2 6AS.

Subscribe today and be part of Europe's leading Free Radio publication!

QSL-COLLECTION

By Jonny Augustsson

Hello and welcome to QSL-Collection. I will try to provide you with good statistic and QSL-reports from the magic world of Free Radio. Here they come:

NEWS TO DATE ABOUT THE RADIOFAX PROJECT

1st March 1993

The following letters (0,0), to the Broadcasting Department of the Department of National Heritage, are self-explanatory. Here is the background:

Radiofax broadcast its service of science, technology, media and technical news and information from Ireland for some four years, ending on 30th September 1992 after telephone calls from the Department of Communications in Dublin had advised us of "embarrassment" to the Republic and threatened enforcement action. We have been applying to the UK Home Office for a licence since 1986 and made (fruitless) submissions in response to the White Paper on Broadcasting in February 1989.

We recently had a meeting with the Broadcasting Department of the DNH. Also present were representatives from the DTI's Radiocommunications Agency. As far as the DNH are concerned we are good news. We are what the government is looking for: new, different, independent, innovative etc. They have had more letters requesting **Radiofax** be licenced than on any other issue, apart from the long wave rumpus. They now want to look into the subject of short wave (know they have to) and produce a policy later this year.

All very hopeful. But, for their part, the DTI see many problems with "availability of frequencies" and the "large amount of work" connected with International registration. Their estimate of the cost of licensing is astonishing.

The point about how it can be right for the VoA, Canada, Japan and others to be broadcasting from British soil, when we cannot, has really put the cat among the pigeons. It seems a most inconsistent practice which has evolved over the years and bypassed the law. It is a question nobody seems keen to answer.

As for Ireland, we ourselves have had a very nice but "I can't get involved" letter back from the President of Ireland, Mary Robinson. Dublin has not replied to listeners, even those who sent two letters or enclosed IRCS. A brilliant idea thought of by one person is complaining to the Irish Ambassador about bringing the Republic into disrepute and far more embarrassing than this radio station they should have been proud of anyway, etcetera. Replies come from Mr. Joseph Small, Irish Embassy, 17 Grosvenor Place, London SW1X 7HR. If they don't even put the subject on the agenda it strengthens our moral position if we were ever to return. They have now got some idea that it is not just another pop station and how much people care about it.

If we can come up with a way in which we could return viably with **Radiofax** I am sure everyone would still be keen, but that's about the news for now.

Station Manager: Trevor Brook.

"The best thing to happen to radio for 20 years" - 1992 Radio Listener's Guide

0.....

I am writing following our meeting about the Radiofax project.

It is encouraging to hear that the diversity and fresh type of service we offer are just what the government is looking for.

The estimated "six figure sum for the WT licence alone" mentioned by the Radiocommunications Agency has to be regarded as outrageous. It is so much higher than charges for other licences or by other administrations that it calls into question the working practices and efficiency of the Department. Can the Radiocommunications Agency not issue a simple licence which does not attempt to specify operating frequencies, but requires them to be properly listed with the International Frequency Registration Board? Such a system would allow the flexibility which is essential on short wave. Also, the BBC might offer economical contract bookings for our handful, along with the many thousands of registrations they regularly make for their own schedules.

We remain interested in the legality under British law of broadcasts to the UK from England by others than the BBC and Radio Authority. BBC World Service transmitters are used, for which general published service maps leave the UK blank, yet programme material and choice of transmission time and frequency leave no doubt that service is aimed at the UK.

The relevance is this. In principle, **Radiofax** could set up from an address abroad and then seek a transmission arrangement with BBC World Service and the Foreign and Commonwealth Office. So far, agreements have only been with state broadcasters of other countries, but where is the statute regulating all this? Foreigners can do things here that British citizens can't. What is going on?

Yours sincerely,

.....

2.....
Thank you for your letter of 3rd February on the subject of short wave broadcasting.

We do know that formulation of a policy on the question of independent short wave services is going to take some months.

Nevertheless, we would appreciate an immediate response to the question about broadcasts to Britain through BBC facilities. Can you please describe for us the law relating to this?

Yours sincerely,

.....
Still available:

Two colour station card and six pages of information, including an artist's impression of the transmitter site with four pages, "Radiofax at September 1992", describing the project so far: 50 pence, 1\$ U.S., or 3 International Reply Coupons.

Radiofax T shirts, made in Ireland, with a thirties-style radio design and the slogan "Britain's Number Two Short Wave Station". One fashionable large size: £9.99.

RADIO PIRANAS SOUTH AMERICAN TOUR

By Jorge R. Garcia

The flight to South America

The time is 23 o'clock and my son, daughter, wife and myself are sitting in a Jumbo Jet 747 from the Spanish company Iberia with flight number IB6921 from Madrid to "the promised land". In the baggage of course, as a true pirate, components for building up a transmitter... Ten hours later, after one stop in Buenos Aires, we arrived at our destination for two months. I was little bit nervous about what the customs would say if they found the tubes etc. The four crystals I brought with me I had put in the pockets of my pants. I had already prepared myself to say to them that the tubes was for an audio amplifier that I would build, in case they would ask. But I was lucky. Even if they took a look into all the baggage they didn't see the components, only my Kenwood R-1000 communications receiver. After passing all that, we met our family who were waiting for us. When we got outside the airport building that had air-conditioning, we were shocked by the very warm weather, 39° C!!! In Madrid it was only 10° C.

Building and testing the transmitter

After a few weeks I began to construct the transmitter. There was a few components that I hadn't brought with me from Europe: 600 V transformer, some resistors and capacitors for the power supply. What I thought was the easiest to find was in fact the most difficult. One day I walked at least 20 km in the capital city looking for a capacitor that could handle high voltage. But no, the highest that the shops had was mostly 35 V. Finally, I found one shop that had only two rated for 250 V. With this we could use only 325 V to the plate. The 15th of January, we managed to get on air. I set up the dipole for 15013 kHz in the middle of the night and so we were on air. Not with full power of the 6146B tubes though because of the power supply. It was very nice to get on air, right from the heart of South America. On the morning the 16th of January, my brother-in-law and I took my father's car and drove a few kilometers to check how it worked, and it was very good. We found a place under a tree and drank the typical South American "terere" cold ice tea and listened to the pre-recorded programme. Then the frequency suddenly was silent. What happened? we asked ourselves. Had the transmitter blown up? We drove back quickly to my father's house and discovered that someone had taken the electricity plug out. It was my father. He is nearly 70 years old and didn't understand what we were doing. He heard that there was a slight sound in the corner of the room and he couldn't see anyone there so he thought why should this be on? So he had simply taken out the electricity plug.

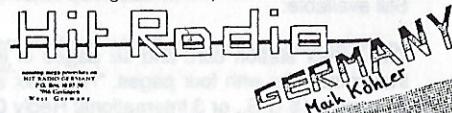

Pirates in the jungle

From the 22nd of January we were right in the jungle for one week. We had 100 km to the nearest city. It was a very nice place. You could see the forest wherever you looked. It was like paradise. The only bad thing in the area is the malaria. I'm not sure if I am contaminated yet, but my brother-in-law got the malaria! Some Indians appeared now and then, visiting the clinic to get attended by my sister-in-law. Sadly enough, we couldn't get on air from there despite the "big plans" that we had. Our intention was to be on the air 4-6 hours a day, but there was no regular electricity, only a generator they would run in the evenings. Well, we had the dipole up, but because of my foolishness I connected something wrong and the capacitor in the power supply blew up. We were only on for some minutes (maybe Jack and Bill could explain why it went wrong after having seen their ultra-modern transmitter on video - the latest in radio technology!!!). Well I got one capacitor in a small village 26 km away, but this was rated for just 300 V and exploded after only some minutes! The others in the house came running into the room thinking that I had almost died!! In fact, I was expecting I would die as it was an offensive smell in the room. I went back to the civilization and I got new capacitors, four very good ones and during the last two transmissions we could rise the power up to about 70 W.

Bye South America

On my stay in this South American country I also visited a few local radio stations. I also met my old radio friend, one of the most known radio personalities who works on the biggest private broadcasting station in the country. Twice he took me out to a restaurant where we ate and talked for a long time about the radio situation in the country, sports and the world in general. He also commemorated his visit in my home in Europe when he had a trip to the "old world", making programmes for his station that was covering a sports event. The 12th of February we were very, very sad since we had to leave South America and return to Europe again. But I hope to go back to South America again in two-three years and then possibly stay there forever! And I also hope I will be able to do some more pirate broadcasting from down there.

73 from Jorge R. Garcia, Radio Piraña International.

RADIO GLORIA INTERNATIONAL

Well its the summer of 1992 and we've finally got round to writing a information sheet. Believe it or not Radio Gloria has been around since 1987 when we got a 30W TX, we didn't do much in the way of broadcasts due to the lack of studio equipment and also due to the fact that our TXs PSU was run from a 12v car battery that needed to be recharged all the time. The 1st real transmission from the station was a QSO with the old 48m station Spectrum World Broadcasting, we mainly just QSOed with WMR for a while after that.

We done the odd music transmission but due to the lack of a mail drop it was a pretty pointless exercise as we could not get any feedback from listeners. We had some problems with our modulation as we couldnt put it very high due to RF feed back. This was cured somewhat at the beginning of 1988 when WMR gave us a new mic, this helped but it did not cure all of the RF, just shortly afterwards we got the use of the 23 S.Beechwood drop, this went ok for a while untill the IC in our modulator blew up, we then had to use a mod system called out board mod which was feeding the mod transformer via an amp, it worked fine. But in 1989 Jack Russel converted our TX to valved modulation it worked just about the best of all our mod systems, later in the year we were payed a visit by Bill of LWR who brought us a present of a HT transformer to power our TX. In late 1991 we felt we would like to broadcast on 15mhz due to the success of stations like WMR, LWR and PFBS, while converting our TX we burned out our tuning caps, but our good friend Bill kindly fixed our TX, he also improved our modulation greatly by giving us the original DX 20 mod choke, at the moment our mod is at the best it has ever been. As of late 1992 we replaced our 48m dipole with a new one, we have also raised it and moved it, it now seems to give us a better signal.

So far we have received reports from the following countries; SCOTLAND, ENGLAND, IRELAND, WALES, FRANCE, HOLLAND, BELGIUM, NORWAY, SWEDEN, FINLAND, ITALY, SPAIN, EAST & WEST GERMANY, CANADA & USA.

Our studio equipment consists of the following; 1 Sanyo belt drive deck, 1 Sanyo direct drive deck, 1 Soundlab 5 channel stereo mixer, 1 Phonics 4 channel stereo mixer, 1 Sanyo music centre used as a amp, 1 ex WMR news mic, various tape decks, our record collection has about 150 albums, 200 7 and 50 12inch singles.

Our Tx has an O/P of 25watts and the ants are $\frac{1}{2}$ wave dipoles.

Lastly thanks to the following people Jack Russel of WMR, Bill Lewis of LWR, Jock Wilson of Radio Stella and Jerry Coatsworth of Canada.

LETTERS

There is still dropping in a few comments on Pirate Connection a little now and then. Our dear friend Albert Dolfing on Radio Scotland seemed to be especially happy about Pirate Connection 2 which had a feature on his station. He also brought PC with him to a pub and many people read the article:

Many thanks for the latest edition of PC, I read it with great pleasure. Also the PC with my interview was very nice, also other readers of PC liked it as I see in the letters in PC9. Many other pirates in my area read it too and I also took the PC with me to a pub and everyone read it and they liked it too.

Jann Larsson in Rönninge, Sweden says:

Thanks to Pirate Connection I've really become alive to the short wave pirates.

Now to something totally different. We've received a rather irritated letter from Magnus Jesperson in Västerås, Sweden and he criticize the charge of 1 IRC/1 USD/1 mint stamp that I and Derek demand for our different mail forwarding services. He writes:

In PC2 I read a quite interesting article on Dutch medium wave pirates ("DX-ing Dutch pirates on medium wave" by Stefan Printz and Derek Taylor). Toward the end of the article, the authors point out that cassette tapes are highly appreciated by the pirates, and that double return postage, a few postcards or similar shall be enclosed. Finally, after the QSL has arrived, a thanks note shall always be sent to the station. In the next issue of PC I noted that DPRS (a quite common address of the Dutch pirate stations) requires one IRC in forwarding charge (2 IRCs for tapes) per report. Things have certainly fallen way below any reasonable price-performance ratio... A reception report may cost SEK 70 or even more according to the principles outlined above. What are the stations (and DPRS) trying to achieve? Pricing themselves out of the market? I have been a more or less active pirate DX'er for more than 15 years now. And as far as I can remember, I have never sent more than two IRCs to a pirate station, and I have not experienced any difficulties in getting QSLs. I am going to stick to my habits in this respect - two IRCs per report - forwarding maildrops or not (this used to be transparent to the DX'er - what has happened in this respect?). If this behaviour results in a major response loss, then the sad, but not quite unexpected, consequence is: my pirate DX-ing days are over.

Well thanks for your comments Magnus. I think you're quite unfair in your description though, saying that a report will cost up to SEK 70. This is just nonsense Magnus. The only thing I and Derek require for our mail forwarding services is coverage for forwarding the report. Many of the pirates Derek and I forward reports to, wouldn't perhaps be reachable at all. Especially Derek's forwarding service of Dutch pirates is especially valuable, as many of the Dutch pirates don't have an address. I would also like to point out that for many pirates (especially Dutch), it's enough to send 1 IRC or 1 USD, so a report wouldn't cost you more than SEK 20. Be sure that neither of Derek and me make any money out of our services, quite the reverse. Often people forget to enclose the forwarding fee, but I've always forwarded the letters anyway and I think Derek has done the same too, even though he receives much more letters than me and it's more frustrating for him if too many don't include enough IRCs/USDs. Derek also wants to comment your letter Magnus:

So far DPRS has received nothing but praise from DX-ers all over Europe. The USA and Canada too. I don't think it is unreasonable to ask for 1 IRC. Magnus says he has never sent more than 2 IRCs. We are not asking more than 2 IRCs. Just one for the station and one for the DPRS. The Dutch pirates have never received as many reports from listeners and they too are full of praise for the DPRS. If Magnus has never had any difficulty in getting QSLs, he must be a very unique DX'er and I'm sure everyone would like to know his secret. Anyway, he's entitled to his opinion, but if he hears any of the listed DPRS stations, I would be very interested to know how he intends to contact them. However, as his pirate DX-ing days are over, I don't think he'll be using the DPRS anyway.

Well that ends "Letters" for this time. If you want to continue the debate Magnus, please send your answer in good time before the deadline of PC5 so that also Derek will have a chance to answer you in time. Cheerio folks...Stefan.

MIKE EVANS
120 Loughton Way
Buckhurst Hill
Essex IG9 6AR
ENGLAND

Dear Stefan;

Thank you for your enquiry regarding "The Octagon" a medium wave receiving antenna.

At last a refreshingly new ready-made loop, which has selectivity, sensitivity, and most important of all DIRECTIVITY.

This eight sided antenna measures 24" wide by 24" tall (609 x 609 mm). It comes ready made, the unit has very good forward gain, so it will "Boost" even the weakest of stations - so displaying on your "S-Meter" (where fitted) S9 plus or 5 LEDs, where before signals only displayed S4 or 2 LEDs. A therefore complete system for distant MW reception. It can be used with any receiver - modern, old valve (tube), tuner, radiogram etc.

The unit has full medium wave coverage - 1.610-531 KHz; full tuning range - 2.200-480 KHz.

Each "OCTAGON" is supplied with a length of co-ax cable, one end going to the antenna's output via a "Belling Lee" type TV plug, while the other end is left open-ended - this goes to your receiver's antenna input marked "GND" and "ANT".

The antenna works in a balanced mode so giving very good immunity to noise, plus good nulling effects. The Octagon's output directly matches LOW or HIGH antenna impedance inputs.

EACH UNIT IS PERSONALLY "HAND MADE"

Compared to others - if you can find them - making medium wave loops, within this price range, the price asked is very fair considering the time involved in making them. Could YOU make them cheaper??

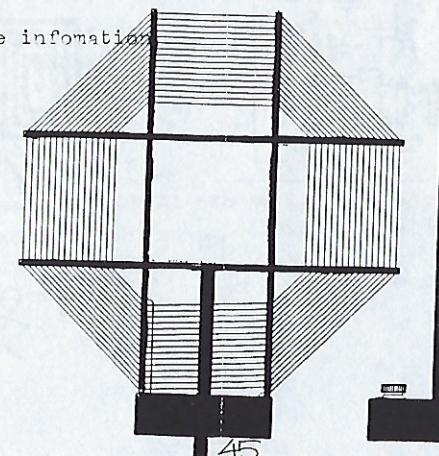

Each loop is lightweight, very directional, and selective, will not overload or cause distortion.

The finished unit should be with you within 10 days of you placing your order. Postal orders receive an even faster service.

Methods of payment: cheque: postal order: eurocheque or international postal money order. Cheques should be made payable to Mrs W Evans: postal orders (uncrossed) made payable to M B Evans.

The cost of each "OCTAGON" is £35 which includes postage and packing in the UK. The "Rest of Europe" should add a further £8.50 making their total £43.50.

Anyone wanting more information
should send 2 x IRC's
or a SASE.

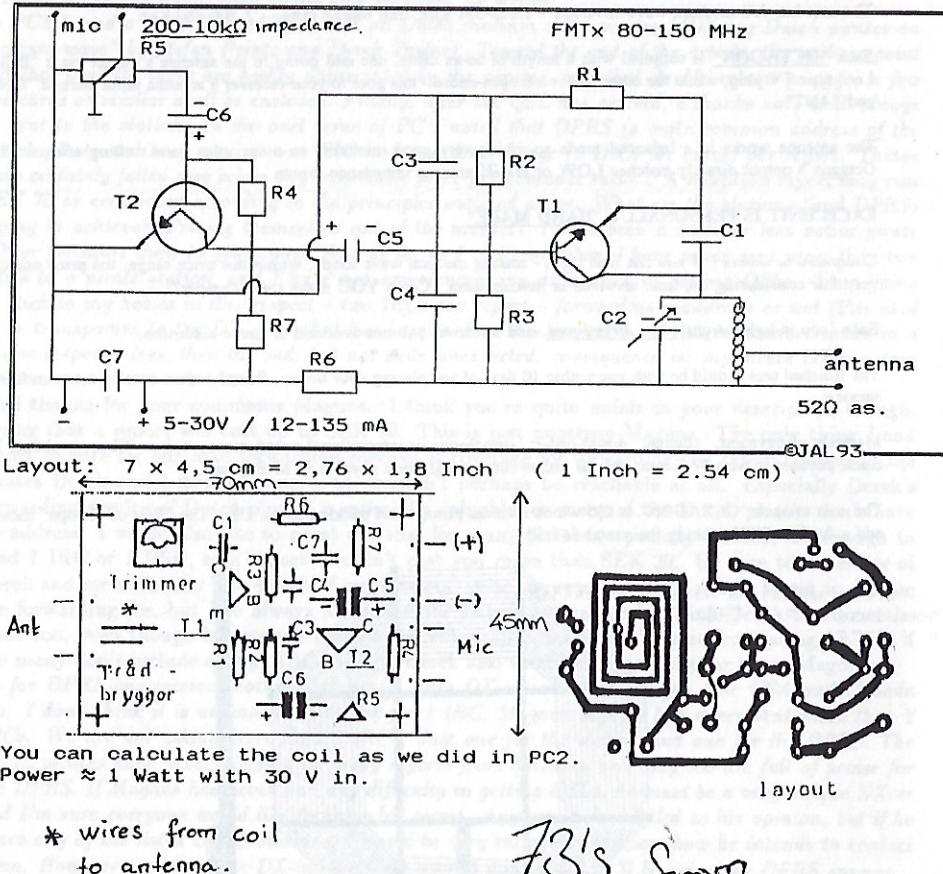

By Jonny Augustsson

Hello Piratelovers, welcome to FRT. Let us now continue with our work on FM.

Shoppinglist:Resistors: Conductors: Transistors:

R1 120 Ohm	C1 4,7 pF	T1 2N2219A
R2 8,2 kOhm	C2 2-15 pF airtr.	T2 BC 107B or equiv.
R3 8,2 kOhm	C3 470 pF	
R4 100 kOhm	C4 470 pF	
R5 22 kOhm tr.	C5 10 μ F/50V	
R6 10 Ohm	C6 4,7 μ F/50V	
R7 15 kOhm	C7 4,7 nF	

I do recomend you to use the layout, but if you want to use a home-made coil, here is the diagram:

Kim Hawk's Starry Thoughts

Good evening Ladies and Gentlemen, this is the sound of Rock & Roll, from the station of the stars, this is Starshine.

I read PC2 and JJ Rambling thoughts, and I have to say, it is up the listener to decide what is quality.

Piratestations normally transmitt because it is fun, not because of some kind of quality- mission. We do not have any rules to go by, we can "jump up" anywhere on the band, but we try not to disturb any other stations. And that was the point I was coming to. There are some stations out there with bad transmitters, and they occupy a lot of frequencies when they are on the air. No names, but there are one particular on the great 76 meterband. Station like those give us "small-band-operating-stations" bad reputation. The normal Dx-er says that we disturb to much and therefore they do not like Pirates. So try not to disturb any other stations when you are on air. When I read reports comming to SR they often say that I was disturbed after 30-45 minutes by other stations operating on a frequency just a few kHz away. This is one of the reasons why I

broadcast in SSB and not in AM. This is some kind of service from Starshine Radio, I whant my listeners to hear SR with a good sound and if I use AM, I know that I can not produce that

because of the risk that another station will appear just a few kilohertz away. So if you are broadcasting in AM, make sure that you have room for your signal first.

Talking about reading reports, it is always nice to receive reports after a show, but it is not that fun to read a BC-report. What I mean by BC-report is a standard form, that you just fill in the blank lines. Use a typewriter, a word-processor or even your beautiful hand-script (I recommend typewriter for some of you DX-ers out there), but not those ugly forms. Please all lovely DX-ers, do not use standard-forms when you report a Free Radio Station!

I hope we meet out there soon on the great 76 mb. This is Kim Hawk and his magic microphone now closing down and standing by.

Cherrico! Kim Hawk
